

Specifications for HarmoniQ Screening Pulsometry

BASIC CHARACTERISTICS

The device model:
HarmoniQ Screening Pulsometry

Presence one of any free
standard serial ports COM1-COM8

The volume of Random Access
Memory (RAM) of the computer min 512 Mb

The volume of Random
Access Memory of the
video controller (VRAM) min 128 Mb

The clock frequency
of the processor min 800 MHz

The free volume of disk space min 20 Mb

Monitor Color VGA
or SVGA

Graphic operational system
Micosoft
Windows

Available soon in Canada, Qatar,
Pakistan, India, Australia and Japan.

What is HarmonIQ Screening Pulsometry?

Pulse analysis is one of the primary diagnostic methods used in classical Chinese medicine. This method is based on the understanding that the beginning and the end of all meridians are found on the radial artery in the region of the radial carpus joint (section Tzun-Kou) where the pulses of all the internal organs can be heard. Pulse joints are located on the meridian of the lungs and in pulse analysis are named Tzun, Guan and Chi.

For every system in the body **HarmoniQ Screening Pulsometry** determines the following parameters:

- ~ Energy that determines the value of the function of (hyper or hypo function)
- ~ Presence of chronic, acute or degenerative pathological processes
- ~ Thermal balance for the definition of the inflammatory process
- ~ Organic changes and neoplasms (sand, stones, stenosis, clot)
- ~ Vegetative state regulation of each functional system
- ~ Prognostic parameters
- ~ Impact of emotional, mental, and other internal and external factors on the functions of the organism as a whole
- ~ Degree of tension vascular framework of functional systems

Application

The process is carried out at two depths, and the pulse 12 major functional systems:

- | | |
|-------------------|-----------------|
| ~ Small intestine | ~ Colon |
| ~ Heart | ~ Lungs |
| ~ Gallbladder | ~ Stomach |
| ~ Liver | ~ Spleen |
| ~ Bladder | ~ Triple warmer |
| ~ Kidneys | ~ Pericardium |

- TZUN ~ Small intestine | Heart
- GUAN ~ Gall-bladder | Liver
- CHI ~ Bladder | Kidney

- TZUN ~ Large intestine | Lungs
- GUAN ~ Stomach | spleen
- CHI ~ Triple warmer | pericardium

Advantages

- ~ Non-aggression - the measurement of the pulse is measured low-frequency acoustic sensor
- ~ Reliable detection of deviations of individual functional energy system is 90%
- ~ Completeness of the presentation of information - all functional energy show organism as a whole and provide information to determine the disease pattern and thus proper treatment
- ~ Fast method - the examination takes 10-15 minutes
- ~ Review is simple and painless
- ~ Current information without waiting for the findings
- ~ Mobility devices
- ~ Guidelines on nutrition (as one of the causes of pathological changes)

Your inner harmony with Eatelligence.

OrganIQ Food is Eatelligence. It represents a unique plant-based blend made of 100% natural ingredients.

OrganIQ Food has one main goal - to restore the imbalance of the human organism in just three weeks of daily usage.

Through the period of 21 days, you will feel the general improvement of your body and mind.

To find out how you can get your 3-week system, please visit www.hsttsolutions.com.
